City, State, Zip	Olympia, WA 98504-0917
Phone	360-902-3000
Contact	Marc Duboiski, Email: marc.duboiski@rco.wa.gov

### PLEASE DESCRIBE THE TYPE OF WORK TO BE COMPLETED

(Be as detailed as possible to avoid having to provide additional information)

#### Provide a detailed description of the proposed project:

North Fork Reach Acquisition will build upon a decade of success in restoring and protecting critical habitat for spring Chinook on the North Fork of the Nooksack River. Through fee title acquisition, the project will acquire additional sites adjacent to conserved salmon habitat properties to protect critical salmon spawning, rearing and refugia habitats. This project builds upon an evolving salmon conservation corridor and will secure an additional three priority north fork properties with significant frontage to allow natural processes to sustain habitat diversity, key habitat quantity and channel stability to support native spring Chinook, winter steelhead, bull trout and other native salmonids. Due to a lack of available funding and at the recommendation of the Combined Review Team, this project has been scaled back from the original proposal and will acquire two of the three proposed sites (Miller and Wildcat). Hanson has been through the review process and will remain as an alternate incase additional funding becomes available or one of the other sites falls through.

---

#### Describe existing project site conditions.

Property is currently vacant. Property historically had a farmstead. Old barn remains. Property has +/- 1100 feet of frontage on North Fork and a side channel. Property has mature riparian forest to contribute large woody debris. Naturally occuring log jams are forming on property river frontage. Salmonid use includes holding, spawning, and rearing habitat. Highly used by Chum salmon.

---

#### Describe any proposed ground disturbing activities. That is, will a tool(s) be used to move earth (soil, rock, gra

Demolition of dilapidated barn structure, decomission old septic system, cap well, remove pile of debris.

---
